

Using this LED driver instead of the existing low voltage transformer, it will double the life of the LED Strip Lights and Light Bulbs. These LED drivers/transformers are suitable for all MR11, MR16LED bulbs and also most LED strip lights making sure the maximum wattage of the strip light does not exceed the maximum output power of the LED driver.

Description:

- * 100% Brand new and high quality
- * 100% Brand new and high quality
- * LED driver transformer suitable for MR16 / MR11 and other 12V LEDs
- * Model Number Y623-12
- * Power: 10W
- * Input Voltage: 170-260VAC 50/60Hz
- * Output Voltage: 12V, Max. DC 830mA
- * Max case temperature: 75 °C
- * Max Environment temperature: 50 °C
 - * short circuit and overload protection
- * Consistent current - will double the life span of your LEDs.
- * Constant voltage and constant current output.

Note:

*** WE STRONGLY ADVISE NOT TO OVERLOAD THE LED DRIVER THAN ITS MAXIMUM WATTAGE RATING AS THIS MAY DAMAGE AND SHORTEN THE LIFE OF THE LED DRIVER.**

Package Content:

- * 1x LED Driver Transformer
